Introducing Joe Schmidt

of KNEW Solutions

Your Cladding Corp Representative

for Ohio, Kentucky & Indiana

Joe is your source for Cladding Corp's

"Big Three" in Rainscreen Cladding material:

Cleveland State University

NBBJ of Columbus continues its excellence in higher education design with Cleveland State University's College of Education featuring [Swisspearl®](#) fiber cement and glass. The Swisspearl panels for Julka Hall were featured in two colors with a darker panel creating shadow lines in the window returns.

University of Kentucky, Lexington

A Payette/JRA Architects design, the Don and Cathy Jacobs Science Building is another example of the seamless integration possible with multiple cladding products. The architects created a dramatic statement at the entrance with terra cotta cladding and white [Swisspearl®](#) panels at the soffit and following through to the atrium inside the building.

Transpo Facility, South Bend, Indiana

For the first transit facility with LEED Platinum certification in the country, RNL Design incorporated [Ceramic5](#) porcelain ceramic rainscreen panels with a metallic finish to enhance the clean design lines of Transpo's Administration and

Maintenance Facility. This stunning, environmentally friendly depot achieved the highest level of LEED certification.

Joe is also your source for engineered, compliant and optimized sub-framing systems by
